**Subject:** Fwd: EPA Public Comment Opportunity - VB/I-70 Superfund Site

Forwarding this to friends who live in the neighborhood. Have a read of Jennifer's remarks and post a comment if you feel compelled.

I have regrettably fallen out of the loop and ostensibly ignorant on this matter but my remark for the record would be that while the topsoil of residential yards has been tested and remediate and might be sufficient were there no plans to

more extensively disturb the local soil, this measure is a drop in the bucket compared to the dust and ensuing airborne heavy metal pollution in the area and waterborne pollution for parts downstream of us that will impact, and has already begun to impact, the area owing to the I-70 rebuild (including - Libertarian might add - the obnoxious and expensive subterranean aspects of the project). This is on top of the Suncor and Cherokee VOC and particulate toxins that already plague our general vicinity. I don't have kids but I sure fear for those who do have kids who will breathe the disturbed soils with years and years of heavy metals leached long before today's regulations existed.

Subject: EPA Public Comment Opportunity - VB/I-70 Superfund Site

# Ex. 6 Personal Privacy (PP)

Hello. You are receiving this announcement as a current or former member of the VB/i-70 Community Advisory Board, or as someone who has shown interest in the VB/I-70 Superfund Site. Please feel free to pass this information along to others who you feel might be interested.

The EPA Notice of Intent to Delete (NOID) Vasquez Boulevard/Interstate 70 (VB/I-70) Operable Unit 1 (OU1), Residential Soils, from the National Priorities List (NPL) is published in the Federal Register today. This kicks off a 30-day public comment period on this proposed action! For those of you who have expressed interest in commenting, this is an important time in the process to submit your comments. CAG members – this would be the time to collect all of your comments about the NOID, including your resolution that you already submitted to us, and submit all of that input. See below for more information and how to comment.

As most of you know from our prior discussions, this means that EPA is proposing to delete VB/I-70 OU1 from the EPA national list of Superfund sites. OU1 included more than 4,500 properties in all or part of six north Denver neighborhoods. EPA sampled 99 percent of the properties for elevated levels of lead and arsenic resulting at least in part from historic smelter operations in the area. EPA and the state of Colorado have determined that all appropriate response actions are complete for OU1, including the sampling of yards at approximately 4,500 properties and the cleanup of yards at approximately 800 properties. This proposed deletion would be a partial deletion of the site and applies only to OU1. Operable Units 2 and 3 (OUs 2 & 3) will remain on the NPL.

To view the Proposed Notice of Deletion, please go to the <https://www.regulations.gov> ; Docket ID no. EPA-HQ-SFUND-1999-0010, or go to <https://www.epa.gov/superfund/vb-i70>. A 30-day public comment period on this proposed partial deletion begins on February 6, 2019. Written comments must be postmarked by March 8, 2019.

Submit public comments by one of the following methods:

- Mail or Email: Jesse Aviles, Remedial Project Manager, US EPA, Region 8, Mail Code 8EPR-SR, 1595 Wynkoop St., Denver, CO 80202, [aviles.jesse@epa.gov](mailto:aviles.jesse@epa.gov). Direct all comments to Docket ID no. EPA-HQ-SFUND-1999-0010.
- Go to: <https://www.regulations.gov> ; Docket ID no. EPA-HQ-SFUND-1999-0010 Follow on-line instructions for submitting comments.
- All comments received will be included in the public docket without change and may be made available online at <https://regulations.gov>.
